SUPPORT AMERICAN PEOPLE'S RIGHT TO DRIVE SAFER CARS

(Mr. KNOLLENBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KNOLLENBERG. Mr. Speaker, today the House will consider an amendment to the energy bill that will raise CAFE standards. Let us be clear, this amendment will be doing nothing more than punishing the auto industry for the sin of making cars that people want to buy.

If this amendment becomes law, Americans will be forced to drive smaller cars that are less safe than what we drive now, and we will see more traffic fatalities. But do not take my word for it. The recent report by the National Academy of Sciences confirms that the downsizing of vehicles in order to comply with current CAFE standards costs American lives. There is a clear correlation between size and risk.

Mr. Speaker, are we ready to sacrifice safety to reduce consumption? I hope not. I urge my colleagues to oppose any increase in CAFE standards beyond what is already in the bill, and support the American people's right to drive safe cars.

ENERGY POLICY

(Ms. SANCHEZ asked and was given permission to address the House for 1 minute.)

Ms. SANCHEZ. Mr. Speaker, I rise today to talk about the type of energy policy that our great Nation should embrace, not the one that the President has put forward.

We should support plans that recognize the need for new energy production and generation, but will at the same time save consumers money, continue the important work to cut pollutants that affect the health of every American, create real jobs and will reduce our percentage of imported foreign oil.

We should support flexible tax credits and incentives for high-efficiency vehicles, the purchase of energy-efficient homes, home and business improvements that reduce our energy costs, critical improvements to our energy infrastructure and energy produced from renewable resources.

I support an energy plan that will combine improvements to our existing energy processes, the development of new and renewable energy resources and energy conservation which truly does make a difference. In California

alone we have seen already a 17 percent decrease in consumption by our retail consumers.

I believe, like most Americans, that a well-balanced energy plan is what we need as a country as we enter the dawn of the 21st century.

EXPLORING THE ARCTIC NATIONAL WILDLIFE REFUGE

(Mr. STEARNS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEARNS. Mr. Speaker, I rise today to make the American people aware of truth about exploring the Arctic National Wildlife Refuge. There is a great misconception perpetuated by the opponents of the President's energy plan, that exploring in ANWR will have an extensive detrimental effect on the wildlife in Alaska. Nothing could be further from the truth.

The proposed area is here in this map. Can anybody find the red dot? This is Alaska. This is the State of Texas. This is the State of South Carolina. That little red dot in there is ANWR.

The land in question is 3.13 square miles. Now, that is a tiny area. It is so small that we can hardly even see it here in the House on this graph. What is more, this 3 square miles is not the ecological wonderland that the opposition has made it out to be. It is a frozen desert with few signs of life.

Mr. Speaker, it is time that the American people cast aside the fabrication of environmental radicalism and explore ANWR's energy resources.

IN SUPPORT OF THE DEMOCRATIC ENERGY PLAN

(Ms. DeLAURO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. DeLAURO. Mr. Speaker, the Republican leadership energy bill is nothing more than a grab bag of goodies for the big special interests in the energy industry.

For the first time, it would allow drilling for oil in the pristine Arctic National Wildlife Refuge, while providing numerous kickbacks for the oil and gas industry, up to \$34 billion in tax credits and royalties to the industry.

The Bush administration and the House leadership will argue that the revised energy plan is balanced, that it includes conservation measures, but the devil is in the details. Their plan provides a fig leaf towards conservation measures and investments in research and development of renewables. It provides billions in tax provisions without any way to pay for them. Instead of finding the offsets, their plan irresponsibly crosses the threshold into the Medicare trust funds.

In stark contrast is the Democratic plan. It is a balanced approach, talking about both supply and demand. It invests in renewable sources of energy, utilizes new technology, bolsters production without harming the environment and provides pro-consumer, fiscally responsible tax incentives for the use of energy-efficient vehicles and appliances. This is the kind of long-term policy we need.

EXPANDING TRADE PROMOTION AUTHORITY

(Mr. LINDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LINDER. Mr. Speaker, Ralph Waldo Emerson wrote, "We rail at trade, but the historian of the world will see that it was the principle of liberty; that it settled America, and destroyed feudalism, and made peace and keeps peace." I could not agree more.

Trade is not just about exports and imports. It is not solely about opening new markets to American technology and services. Instead, trade is about harnessing the growth and innovation of the American marketplace to improve the quality of life both domestically and internationally.

Trade promotion authority in turn further enables the exchange of services, goods and services, ideas and information. TPA requires a collaborative partnership between the President and the Congress allowing Congress to share concerns, priorities and goals before and throughout negotiations. The House is allowed to express its interest in issues whether they relate to environment or labor that otherwise might not be considered during the negotiation process at all.

The United States must lead by example. On trade, however, we are far behind. Of the more than 130 trade agreements worldwide, the United States is party to only two. TPA will enable the President and the Congress to reverse this trend and ensure that our exports reach the outside world along with our outlook and ideals.

ENERGY BILL BONANZA FOR BIG OIL

(Mr. SHERMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHERMAN. Mr. Speaker, the energy bill is a bonanza for big oil. It lets them drill in environmentally sensitive lands, gives them \$30 billion in tax cuts and another \$7 billion of rollbacks and royalties.

Listen to this. They tell us government should act like private business. Would a private businessperson let an oil company drill on his land without getting a royalty? That is what this bill does. It is a bonanza for big oil.
